We recommend to use g/L for those thicker staves
(not the contact surface)

Graphs produced from gas chromatographic analysis and our tasting experience.

Infra toast

Untoasted

Fresh oak flavors pushing the fruity character, structure and fresh notes.
Recommended use of 5-10% of the oak blend.

Light

The fruit is highlighted with a nice sweetness.
Light and elegant impact.

Medium

Volume is boosted, good respect of the fruit with some vanilla notes and pleasant tannins.

Medium +

Some more tension. There is a nice balance with integrated tannins preserving the fruit. Elegant toasted notes.

Heavy

Richer and darker impact with jammy, sweet spices and toasted aromas.

Convection toast

Untoasted

Fresh oak flavors pushing the fruity character, structure and fresh notes.
Recommended use of 5-10% of the oak blend.

Light

Freshness, tension and roundness on the palate. Moderate aromatic impact to highlight the purity of the fruit.

Medium

Brings body and fullness to the mid-palate.
Gentle and elegant with sweetness, vanilla and some spicy notes. Fruit is lifted.

Medium +

Gives a great aromatic intensity, more volume, juicy tannins and complexity. Notes of coffee and toasted notes.

Barrel toast

Light

Respects and enhances the fruit, brings some sweetness in the mid-palate. Fine and fresh texture.

Medium

Complexity on the nose, the fruit is denser with some spicy notes. Tannins are present yet well integrated.

Medium +

Ripe black fruit, some vanilla and sweet spices, coffee notes. Powerful mid-palate with good volume. Good length.
